Learn about the SEBO Duo P Dry Carpet Cleaner

DESIGNED TO DRY CLEAN CARPET AND UPHOLSTERY

SEBO's easy-to-use duo Cleaning System effectively cleans large or small carpeted areas and removes stubborn stains from upholstery and carpets. The duo-P Powder and Brush Machine can easily clean a house full of carpeting! This do-it-yourself system keeps strangers out of your home, saves time and money, and avoids potential carpet damage caused by most wet cleaning methods. The duo Daisy and Hand Brush quickly clean high-traffic areas and stairs.

The duo System consists of the following four components, which are all sold separately:

1. The duo-P Carpet and Upholstery Cleaning Powder.
2. The duo Brush Machine for cleaning large carpeted areas.
3. The duo Daisy Brush for cleaning small to medium-size carpeted areas, like hallways.
4. The duo Hand Brush for cleaning spots, stairs and hard-to-reach areas.

Advantages of using the duo System are:

- Do-it-yourself carpet cleaning saves money and time and keeps strangers out of your home.
- Avoids potential damage caused by most wet cleaning methods.
- Almost immediate use of the carpet or upholstery.
- Eliminates dust mite allergens.
- No need to move furniture and easily cleans stairs.
- No carpet shrinking or mildew.
- No detergent residue.
- A built-in fiber protector helps to protect against future stains and soil.

Step One

Carpet and Upholstery Cleaning

SEBO duo-P Cleaning Powder Cleans Carpet and Upholstery

This amazing powder cleans carpets or upholstery to like new condition and removes even the most stubborn stains! It is made of polyurethane granules moistened with cleaner and is environmentally friendly and safe to use. And, unlike other cleaning powders, no pre-spray is needed. (Tightly seal partially used package after opening to maintain

powder is the carpet moistened granules lift soil out. Within minutes, the powder is dry and is removed by vacuuming leaving the carpet or upholstery clean dry and ready for use.

moisture.) When the worked into fibers, the sponge like and stains about 30 powder is

Because this is a DRY-cleaning process duo-P Powder WILL NOT PROMOTE THE GROWTH OF MOLD AND FUNGUS in your carpet and pad that we extraction systems may cause. And the GAF allergy research center in Germany found that six months after a single cleaning with duo-P, seven out of ten carpets remained free of dust mite allergens.

The duo Brush Machine Cleans Large Carpeted Areas

Sebo's duo Brush Machine features two spinning brushes that open the carpet pile, enabling the duo-P Powder to clean each fiber. Weighing only 11 pounds, it is lightweight and easy to use. And with a brush path width of 12 1/2 inches, an entire house or a room of carpet can be quickly cleaned.

The duo Daisy Brush Provides Quick Convenient Carpet Cleaning

This duo accessory is a necessity! The Daisy is a single brush and is not motorized. However, it is the ultimate in convenience because, with its adjustable handle and very light weight, one can work in a comfortable upright position and clean both small and medium-size carpeted areas, such as hallways or an entire room. It can also be used to clean the carpet and upholstery in cars, boats and RVs. The Daisy even offers two brush bristle options for different types of carpet: easy or aggressive. Its adjustable handle accommodates user height preferences and enables it to be stored in small spaces.

Why Use Dry Cleaning?

Wet cleaning methods inject water and detergent into the carpet pile under pressure, and an extractor is used to collect the liquid and dissolved soil. It is impossible to remove all of the water and dissolve soil from a wet carpet. Many machines only remove 50% of the dirty water, so much of the remaining water soaks into the pad. Often, this amount of moisture will cause deterioration of the carpet backing, and a wet carpet may take 8 to 36 hours to dry, depending on humidity. That is long enough for mold spores to grow. Also, carpets may re-soil quickly because of residual detergent, and spots may reappear in a short period of time, as the moisture and dissolved soil wicks up through the carpet fibers.
